RSIC[®] Products Now Available With Recycled Content

LAS VEGAS, NV -- The RSIC[®] family of noise control products are now available with recycled content and are made in the USA. PAC International's patent pending, recycled compounds have resulted in improved noise control performance with hundreds of Underwriters Laboratories Classified Fire Resistive Design Assemblies.

"The RSIC[®] Recycled Content products support the company's philosophy of being socially responsible," says Elzo Gernhart, Vice President of PAC International, Inc. "Resilient Sound Isolation Clips have always been made with 100% recyclable materials. The move to recycled content is a major step for sustainable design and construction practices, and the environment."

The new RSIC[®] Recycled Content products may contribute to obtaining a Leadership in Energy and Environmental Design (LEED) rating for a *green building* as created by the U.S. Green Building Council.

PAC International, Inc., is the world leader in *Noise Control Solutions* and is dedicated to delivering innovative engineering solutions, systems and assemblies using RSIC[®] products that result in benefits to developers, builders, design professionals and the environment. RSIC[®] products are UL Classified and exceed fire rating performance standards. The RSIC[®] family of *Noise Control Solutions* consistently achieves superior Sound Transmission Class (STC) and Impact Insulation Class (IIC) ratings in both new construction and renovations while remaining cost effective and environmentally friendly.
