**RSIC<sup>®</sup> Garage Door Silencer Kit**

LAS VEGAS, NV -- Single and multi-family homes, apartments, condominiums and other dwellings with living space above or adjacent to a garage can now enjoy peace and quiet with the **RSIC<sup>®</sup> Garage Door Silencer Kit** from PAC International.

The Kit decouples the garage door opener from the building's structure, significantly reducing vibrations and motor noise that result when the mechanism is engaged. The Kit can also be used to isolate garage door rails to further decrease noise level transmission to adjacent rooms.

Richard Krahnke, M.D., installed a **RSIC<sup>®</sup> Garage Door Silencer Kit** in his residence. "As a medical doctor, I routinely leave for work very early and am occasionally called out at odd hours due to emergencies. Before the Kit was installed, my wife and young children were awakened every time the garage door opened or closed. Once the **RSIC<sup>®</sup> Garage Door Silencer Kit** was installed, my family is no longer awakened when the garage door is engaged. This easy to install Kit allows my family to get the rest they need."
