## RSIC-SI-1 ULTRA Product Guide Specification

Specifier Notes: This product guide specification is written according to the Construction Specifications Institute (CSI) 3-Part Format, including *MasterFormat*, *SectionFormat*, and *PageFormat*, contained in the *CSI Manual of Practice*.

The section must be carefully reviewed and edited by the Architect to meet the requirements of the project and local building code. Coordinate this section with other specification sections and the drawings.

Delete all "Specifier Notes" when editing this section.

### SECTION 13085

#### SOUND ISOLATION

Specifier Notes: This section covers PAC International, Inc. "RSIC-SI-1 ULTRA" Resilient Sound Isolation Clip installed with drywall furring channels for support of gypsum board for acoustical separation (de-coupling) in ceilings. Consult PAC International for assistance in editing this section for the specific application.

#### PART 1 GENERAL

##### 1.1 SECTION INCLUDES

- A. Resilient sound isolation clips installed with drywall furring channels for support of gypsum board for noise control (de-coupling) in ceilings.

##### 1.2 RELATED SECTIONS

Specifier Notes: Edit the following list of related sections as required for the project. List other sections with work directly related to this section.

- A. Section 05400 - Cold-Formed Metal Framing.

RSIC-1

13085 - 1

- B. Section 06110 - Wood Framing.
- C. Section 07210 - Building Insulation.
- D. Section 07920 - Joint Sealants.
- E. Section 09110 - Non-Load-Bearing Wall Framing.
- F. Section 09250 - Gypsum Board.
- G. Section 09260 - Gypsum Board Assemblies.
- H. Section 09820 - Acoustical Insulation and Sealants.

### 1.3 REFERENCES

Specifier Notes: List standards referenced in this section, complete with designations and titles. This article does not require compliance with standards, but is merely a listing of those used.

- A. AISI Specifications for Design of Cold-Formed Steel Structural Members.
- B. ASTM B 633 - Standard Specification for Electrodeposited Coatings of Zinc on Iron and Steel.
- C. ASTM C 645 - Standard Specification for Nonstructural Steel Framing Members.
- D. ASTM C 754 - Standard Specification for Installation of Steel Framing Members to Receive Screw-Attached Gypsum Panel Products.
- E. ASTM C 840 - Standard Specification for Application and Finishing of Gypsum Board.
- F. ASTM C 1002 - Standard Specification for Steel Self-Piercing Tapping Screws for the Application of Gypsum Panel Products or Metal Plaster Bases to Wood Studs or Steel Studs.
- G. ASTM D 412 - Standard Test Methods for Vulcanized Rubber and Thermoplastic Elastomers - Tension.
- H. ASTM D 573 - Standard Test Method for Rubber-Deterioration in an Air Oven.
- I. ASTM D 2000 - Standard Classification System for Rubber Products in Automotive Applications.
- J. ASTM D 2240 - Standard Test Method for Rubber Property - Durometer Hardness.

## 1.4 DESIGN REQUIREMENTS

Specifier Notes: The "RSIC-SI-1 ULTRA" Resilient Sound Isolation Clip acoustic assembly is a proprietary product used for fastening gypsum board to a supporting structure, while simultaneously isolating it from vibration. This significantly reduces the amount of impact and airborne sound filtering from rooms above, below, and alongside.

To maximize the noise control capacity and potential of the RSIC-SI-1 ULTRA, a professional acoustical engineer should be consulted. PAC International offers computer modeling for STC to assist in your design.

- A. Dead or Shear Load: Maximum design load specified by the spring load rating.  
(5 lb ~ 40 lb)

## 1.5 SUBMITTALS

- A. Comply with Section 01330 - Submittal Procedures.
- B. Product Data: Submit manufacturer's product data and installation instructions.
  - 1. Resilient sound isolation clips.
  - 2. Drywall furring channels.
- C. Samples: Submit manufacturer's samples.
  - 1. Resilient sound isolation clips.
  - 2. Drywall furring channels.
- D. Warranty: Submit manufacturer's standard warranty for resilient sound isolation clips.

## 1.6 DELIVERY, STORAGE, AND HANDLING

- A. Delivery: Deliver materials to site in manufacturer's original, unopened containers and packaging, with labels clearly identifying product name and manufacturer.
- B. Storage: Store materials in clean, dry area indoors in accordance with manufacturer's instructions.
- C. Handling: Protect materials during handling and installation to prevent damage.

## PART 2 PRODUCTS

### 2.1 SOUND ISOLATION

- A. Sound Isolation Clips: Resilient Sound Isolation Clip (RSIC-SI-1 ULTRA).

RSIC-1

13085 - 3

1. Manufacturer: PAC International, LLC., Las Vegas, NV. Toll Free (866) RSIC-100 (866) 774-2100. Phone (503) 649-7700. Fax (503) 649-2710. Web Site www.pac-intl.com. E-Mail info@pac-intl.com.
2. Rubber Isolator:
  - a. Natural virgin and recycled organic rubber compound, blended with fire-inhibiting compounds.
  - d. Manufactured to ASTM D 2000, M2 AA 510 A13, which includes:
    - 1) Hardness, ASTM D 2240, Shore A: 47.
    - 2) Modulus 300 Percent, ASTM D 412, Die C: 5.3 MPa.
    - 3) Tensile Strength, ASTM D 412, Die C: 11.2 MPa.
    - 4) Elongation at Break, ASTM D 573: 454 percent.
3. Clip: Galvanized or aluminum-zinc coated steel, 18 gauge.
4. Ferrule: Zinc-electroplated steel.
5. Spring: Color coded to specified load ratings. Each load rating designed with 1/2" deflection when loaded to specified rating.
5. Drop: Ceiling height specified by the combination of thread length below RSIC-SI-1 ULTRA clip and spacing of drywall furring channel guide.

Specifier Notes: The following materials are not furnished by PAC International.

**B. Drywall Furring Channels (Hat Track):**

1. Material: Cold-formed galvanized steel.
2. Conformance:
  - a. AISI Specifications for Design of Cold-Formed Steel Structural Members.
  - b. ASTM C 645.
  - c. ASTM C 754.
3. Designation: Steel Stud Manufacturers Association (SSMA) Code 087F125-18 (25 gauge).
  - a. Size: 0.0179 inch (0.53 mm) thick, 7/8 inch (22.2 mm) height, 2-9/16 inches to 2-11/16 inches (65.1 mm to 68 mm) width.
  - b. Hemmed edge detail.

**C. Mechanical Fasteners:**

1. Type: Self-drilling, self-tapping screws. Steel, ASTM C 1002. Galvanized coating, plated, or oil-phosphate coated, ASTM B 633, as needed for required corrosion resistance.
2. Resilient Sound Isolation Clip Connections:
  - a. To Wood Framing Members: Two screws 1-1/2 inches (36 mm) minimum length, #8 minimum shank, Type W (course thread), bugle- or hex-head screws of equal or greater size.
    - 1) Minimum allowable Pullout and Shear: 80 pounds.
  - b. To Steel Framing Members (20 Gauge through 12 Gauge): Screws 1 inch (25 mm) minimum length; #8 minimum shank; Type S (fine thread); self-drilling tip; bugle-, wafer-, or hex-head screws of equal or greater size.
    - 1) Minimum allowable Pullout and Shear: 80 pounds.

3. Drywall Furring Channel Lap Joint Connection, Steel to Steel: Framing screws, button head, 7/16 inch (11 mm) minimum length, #6 minimum shank, needle point, Phillips drive or greater, or double-wire tie with 18 gauge tie wire.
- D. Tie Wire: 18 gauge, annealed, galvanized steel.
- E. Acoustical Sealant: Flexible, non-hardening. As specified in Section 07920.
- F. Putty Pad Sealant: Control noise transmission at electrical boxes and other penetrations. As specified in Section 07920.

## **PART 3 EXECUTION**

### **3.1 EXAMINATION**

- A. Examine areas to receive materials. Notify Architect if areas are not acceptable. Do not begin installation until unacceptable conditions have been corrected.

### **3.2 INSTALLATION - GENERAL**

- A. Install resilient sound isolation clips and drywall furring channels in accordance with manufacturer's instructions.
- B. Mechanically fasten resilient sound isolation clips to structure with screws, dependent upon structure.
- C. Fire-Resistive Design Assemblies:
  1. Do not arbitrarily add resilient sound isolation clips to fire-rated assemblies.
  2. Verify UL Fire Resistive assemblies with manufacturer, or at [www.UL.com](http://www.UL.com)
- D. Space resilient sound isolation clips at manufacturers recommendation through PAC International, Inc. design center for ceilings.
- E. Do not exceed design load as specified by spring rating for each isolation clip.
- G. Splicing Drywall Furring Channels:
  1. Splice drywall furring channels with minimum of 6-inch (150-mm) laps.
  2. Secure laps with 2 framing screws or 18 gauge tie wire double wrapped.
  3. Locate splices between resilient sound isolation clips.
  4. Do not locate splices on resilient sound isolation clips.
- H. Flanking Noise:
  1. Review installation details to prevent structure-borne flanking noise.
  2. Do not allow drywall furring channels or gypsum board to contact foreign materials, including floors, ceilings, or wall framing members.
- I. Gypsum Board:
  1. Install gypsum board with 1/8-inch (3-mm) to 1/4-inch (6-mm) gap around perimeter for acoustical sealant application.

2. Install gypsum board in accordance with ASTM C 840 as specified in Section 09250.

J. Wall Ceiling Intersection

1. Insert Perimeter gasket material or acoustical caulking at intersection of wall and ceiling systems to ensure perimeter of
2. Seal electrical outlets and penetrations with acoustical sealant.

K. Acoustical Sealant:

1. Seal potential air leaks with acoustical sealant to achieve best Field Sound Transmission

L. Putty Pad Sealant: Acoustically seal with putty pads, electrical boxes in walls and ceilings in which resilient sound isolation clips are used.

### 3.2 INSTALLATION - CEILINGS

Specifier Notes: Special consideration should be given to all penetrations, such as recessed light fixtures, electrical boxes, exhaust fans, and sprinkler heads to ensure the control of both STC and IIC noise transfer. Consult PAC International or an acoustical engineer for additional information.

- A. Install drywall furring channels perpendicular, parallel, or angular to framing members.
- B. Space Drywall Furring Channels:
  1. Maximum of 24 inches (600 mm) on center with:
    - a. Single layer of 5/8-inch (16-mm) gypsum board.
    - b. Double layer of 5/8-inch (16-mm) gypsum board, weighing less than 2.25 pounds per square foot per layer.
    - c. Single layer of 1/2-inch (12-mm) high-strength gypsum board.
    - d. Double layer of 1/2-inch (12-mm) high-strength gypsum board.
  2. Maximum of 16 inches (400 mm) on center with:
    - a. Double layer of 5/8-inch (16-mm) gypsum board.
    - b. Single layer of 1/2-inch (12-mm) regular-strength gypsum board.
    - c. Double layer of 1/2-inch (12-mm) regular-strength gypsum board.
  3. Reduce spacing of drywall furring channels to prevent potential for sagging of gypsum board or when additional loads are supported by resilient sound isolation clips.
- C. Locate resilient sound isolation clips maximum of 8 inches (200 mm) from ends of drywall furring channels.
- D. Locate drywall furring channels maximum of 3 inches (75 mm) from parallel wall assemblies.

**END OF SECTION**
